BUSINESS CONTINUITY
AND PRODUCTIVITY.

**NETWORK SOLUTIONS
YOU CAN TRUST**

"Like many companies, our business is one where we rely almost exclusively on our computers and our network to perform our job. Before we hired Myers Network Solutions to administer our network, we spent an extraordinary amount of time troubleshooting problems that only seemed to get worse as technology advanced.

This all changed when we retained Myers Network Solutions. It quickly became clear to me that MNS's level of expertise was exactly what we were missing. Their integrity and dedication has given me the confidence that our network is in good hands allowing me to focus more on what we are really in business to do. I continue to be impressed everyday and I would recommend Myers Network Solutions to anyone seeking network or computer administration."

*- Nathan Ankney, Chief Financial Officer
American Pegasus LDG LLC, San Jose, California*

- **Complete custom network design and installation**
- **Network auditing and analysis**
- **Internal and external network security**
- **Network maintenance and support**
- **Data protection and storage**
- **Website design, development and maintenance**

MyNet Managed provides proactive, monthly or weekly IT maintenance and support by certified network engineers with exceptional people skills. **MyNet Managed** also includes telephone and remote - access user support. We become your on-staff Network Administrator. Our managed network preventative services give you peace-of-mind in knowing your computer network and systems always run reliably and smoothly.

Every business needs extra help from time-to-time. Some prefer a pay-as-you-go option.

MyNet Flex provides as-needed IT solutions – from occasional telephone support questions to the upgrade or expansion of your network coverage. Our network engineers are certified and experienced in computer network design and installation. We can also augment your IT staff on a temporary or routine basis.

You need a scalable, reliable and easily supported network designed to meet today's business needs and growth objectives. With a clear understanding of emerging technologies, we listen to you and then integrate the software and hardware that best serves your customers and employees. **MyNet Design** presents the ideal infrastructure for your particular business, ensuring it performs at or above your highest expectations for many years to come.

In time, your network can develop unforeseen internal and external vulnerabilities. **MyNet Audit** will assess your infrastructure, providing an all-inclusive analysis along with targeted hardware and software

recommendations. We can also assist you to achieve regulatory compliance as needed. We provide written recommendations for efficient, economic productivity and growth.

We're behind you - wherever you go.

MyNet Web provides new website creation, enhancements and updates. We offer website design and copy writing services that fit your budget, meet your company goals and stand the test of time while driving the strongest marketing advantage. As your company products and services expand, **MyNet Web** offers a maintenance plan on an hourly, as-needed or on-going monthly basis.

Data loss is devastating to your business and livelihood. While a major disaster like earthquake or fire can cause a catastrophic data loss, most data is lost during everyday occurrences like server failure or simple human error. But **MyNet Secure** solutions protect your critical data, ensuring you always have a reliable backup and retrieval plan. The **MyNet Secure** integrated approach includes high availability and disaster recovery solutions such as redundant systems for data and applications, disk-based, tape or snapshot backup, continuous data protection and online, offsite solutions.

What MNS clients are saying...

"We had significant growth and challenging network issues. MNS came through with a great design and installation. I'd recommend them to any business."

- HR Ideas, LLC., San Ramon, CA

"I love MNS interpersonal skills and obvious IT knowledge. I highly recommend their services."

- Rob DeSantis, Ariba Co-Founder and former EVP, Los Gatos, CA

"MNS is professional, knowledgeable and friendly and most important, they respond quickly to IT issues."

- Samaritan Medical Center, San Jose, CA

"MNS level of client commitment is rarely found. They are a valued member of our team."

- The Noble Group, San Mateo, CA

"MNS installed an affordable, efficient network for our new offices. Their monthly service is great and their team is always available for IT issues."

- DYI Properties, Seaside, CA

"Since 2003 our 30-user precision sheet metal and parts manufacturing operation has greatly depended on MNS proactive weekly IT maintenance and consulting services to maintain our network and specialized CAD, sales, shipping, communications and accounting applications. We recommend MNS to any business seeking quality IT management and support."

- Tri-Fab Associates, Inc., Fremont, CA
